

**IN THE DRAWINGS**

Please add new drawing sheets for Figures 7D and 7E, as attached herewith. The Examiner has previously indicated that certain claimed features are required to be shown in the drawings under 37 C.F.R. 1.83(a). Figures 7D and 7E show features already disclosed in the application and/or incorporated by reference at the time of original filing of the application, as discussed in the remarks section below. Hence no new matter has been added.

**REMARKS**

Claims 1-33 are pending in the application. This application has been previously Allowed (see Notice of Allowance dated August 3, 2005), for which the Applicant wishes to express appreciation to the Examiner. However, Applicant has elected to file a Request for Continued Examination (RCE) and an Information Disclosure Statement (IDS) to have prior art considered by the Examiner that has come to the attention of the Applicant.

Moreover, on page 2 at paragraph 3 of the Notice of Allowance dated August 3, 2005, the Examiner objected to the drawings under 37 C.F.R. 1.83(a) stating every feature of the invention specified in the claims must be shown. In response to the Examiner's request, and in order to overcome the drawing objection, Applicant has amended the application and drawings to include Figures 7D and 7E and explicit support therefore. Figures 7D and 7E show examples of the claimed limitations regarding the attempt to transmit and wherein instructions are executable instructions and collect the notification information and the instructions are configured to grant or deny access to the requested data based on the results of the attempt to transmit (see Notice of Allowance page 2, paragraph 3). No new matter has been added.

Specifically, Figure 7D is a block diagram of an embodiment showing electronic content 138 with electronic content 138b such as text, graphics, audio, video, and/or executable program files, and notification instructions 138c that collect and transmit notification information. Figure 7D is based on Figure 1 of U.S. Patent No. 6,751,670, which was incorporated by reference at the time of original filing (see application at page 5, line 31 to page 6, line 3) with modifications of reference numerals to be consistent with the current application reference numbering, hence no new matter has been added.

Figure 7E is a flow diagram showing steps of processing notification instructions. The steps of Figure 7E is based on Figure 4 of U.S. Patent No. 6,751,670, which was incorporated by reference at the time of original filing, with modifications of reference numerals to be consistent with the current application reference numbering. Hence no new matter has been added.

Further, the specification has also been amended to appropriately reference and support drawings 7D and 7E. The specification amendments are based on incorporated

Serial No.: 09/231,714

sections of U.S. Patent No. 6,751,670, including portions from at least col. 7, lines 15-43, and col. 7, line 66 to col. 8, line 42. No new matter has been added. Applicant believes these amendments overcome the 37 C.F.R. 1.83(a) drawing objections previously made by the Examiner in the Notice of Allowance of August 3, 2005, without adding new matter.

**Conclusion**

Prompt and favorable reconsideration is requested of the application. The Examiner is invited to contact the undersigned at the telephone number listed below, if needed. Applicant hereby makes a written petition for extension of time if needed. Please charge any deficiencies and credit any overpayment of fees to Attorney's Deposit Account No. 23-1951.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Charles J. Gross". The signature is fluid and cursive, with the first name "Charles" and last name "Gross" clearly distinguishable.
